

Stadt Hamburg.

Savannah River

Hamburg

Founded
Second July 1731.

By
Henry Skults

South Carolina

By the direction of Henry Skults, founder of Hamburg,
I have surveyed the Town and some other alterations in the original plan, and have the various measures by the
order of the Legislature of this State, for restoring and changing the name of Hamburg Street to that
of Centre Street, and by the completion of the Rail Road, an accurately measured in the above Plans.

The letters A, B, and D designate three Groups of four Water elevations in the Plan, several feet
above the level of the highest part of the Town.

The Town survey in on at the corner of Centre Street, from three vertical Springs, four hundred
paces from the Town line, and fifteen feet above its level. The water from the Springs is conveyed by a Cuttle along
under to Centre Street, and in that Street is the water now low measure of the Town.

The stone Run leading from the Village runs in a high embankment, and at E and F are
guard-gates which run to Centre and the Village, respectively, and with Water in on great floods will keep the back
water of the River from the lower parts of the Town.

The Town is elevated from High to Low, six feet above the level of the River in common low
water, and terminates at the Southern Boundary in a beautiful High rising from gently to one hundred feet
above the same level.

July 25th February 1835
J. H. Thompson

Landgrave Office
Savannah 25th Feb 1835
The above plan of the Town of Hamburg
is the original plan, and the original
survey of the lot of the Town, and
to the Legislature of the several States
of the United States, and to the Legislature
of the State of South Carolina, and to the
Surveyors in the 17th day of December 1731
J. H. Thompson
